TECHNICAL SKILLS

Languages	C/C++, Python,C#, JavaScript
Frameworks	.NET, Node.js, Express, FastAPI
AI & LLM	LangChain, LangGraph, LangSmith, Google ADK, Ollama RAG, Prompt Engineering, Vector Search, Embeddings ,OpenAI
Databases	MongoDB, MySQL, Chroma DB
DevOps & Cloud	Docker, Azure, Git, GitHub, CI/CD, Apache Kafka
Testing & Tools	Playwright, Jest, xUnit, TanStack Query, Claude Code
Coding	LeetCode 1700+ rating

EXPERIENCE

Software Developer Engineer Intern - OpenLM	<i>Jan 2026 - May2026</i>
• Built Playwright scraping workflows for JS-rendered sites, reducing plugin processing time by 67%. • Implemented event-driven communication with Apache Kafka for scalable asynchronous processing. • Designed backend services using Clean Architecture and CQRS principles to improve maintainability and extensibility. • Drove end-to-end test automation using AAA (unit + integration +service), raising Azure pipeline code coverage by 10% • Migrated Angular suites from Karma to Jest cutting execution time.	

EDUCATION

Indian Institute of Engineering Science and Technology Shibpur	<i>Nov 2022 - 2026</i>
B.Tech, Computer Science and Technology	<i>Overall GPA: 8.7/10</i>

PROJECT

Production-Grade Agentic RAG System	<i>[FastAPI, LangChain, LangGraph,LangSmith]</i>
Github- https://github.com/a-nnurag/production_rag	
• Built a production-grade RAG and agent-based system for context-aware question answering and multi-step reasoning workflows • Implemented LLM agent orchestration using LangGraph, enabling structured tool execution and improved reasoning flow across complex queries • Designed a security layer with prompt injection detection, input sanitization, and PII protection (emails, phone numbers, API keys) to ensure safe LLM interactions • Followed Test-Driven Development (TDD) using pytest with AAA pattern, writing 37+ unit tests ,service level test and integration test covering API, retrieval, and security modules • Integrated LangSmith observability for tracing, debugging and monitoring LLM chains in production	
Autonomous Content Research Agent	<i>[Python, Google ADK,PRAW]</i>
Github- https://github.com/a-nnurag/RedditAgent	
• Parsed top Reddit posts/comments via PRAW by topic or subreddit. • Performed sentiment analysis, computed engagement metrics with help of llm. • Suggested high-performing content using keyword relevance . • Impact: Reduced research time from 4 hours to under 2 minutes; 85% accuracy in analysis.	

ACADEMIC ACHIEVEMENTS

- Ranked 5th in the GeeksforGeeks Hackathon 2026 and led team to 1st place in the Hult Prize Pitch Competition 2023.
- Secured 2nd place in the Robococon Hovercraft Competition at IEST Shibpur and represented the institute at Kshitij AeroModelling Competition, IIT Kharagpur.
- Ranked Top 1.5% in JEE Mains and Top 5% in IIT-JEE Advanced (925K+ combined candidates); qualified NTSE Stage I II , KVPY-SX, placing among top performers across 1M+ applicants nationwide and NDA under 2000rank.
